Part 1

Manitoba Population Report – 2013

Introduction and Overview

FOREWORD

The population data shown in this report are based on records of residents registered with Manitoba Health as at June 1, 2013.

Data for the regions include population of cities, towns, villages, rural municipalities, local government districts, and unorganized territories. It should be noted that villages and towns are separately identified if these are incorporated. If unincorporated, the population counts are included in the rural municipality in which these are located.

Population for small areas (for example, a rural town) can be biased because the mailing address may be reported as the place of residence. An individual residing outside the town, but having a mailing address there, may be counted as living within the town. This bias in the population figures is reduced as the catchment area increases. Thus, regional estimates are not significantly affected by the mis-classification bias. Fluctuations from year to year for these small areas might also be affected by changes to mail delivery locations assigned by Canada Post.

The type of place indicates First Nations, unorganized territory, and municipal status of incorporated places (city, town, village, rural municipality, and local government district). The following list indicates the abbreviations used for types of places:

FN First Nation Band

LGD Local Government District - a designated area having no local government; administered by the province through a resident administrator.

R.H.A. Regional Health Authority

RM Rural Municipality

POPULATION REPORTING CHANGES

Internal improvements affecting population reporting have enabled more appropriate identification of on-reserve residents of some First Nations communities, as of the 2012 population reports.

Current-year and five-year populations for RHA Districts were tabulated using the RHA District definitions current as of June 1st, 2013. Upcoming municipal amalgamations may result in future changes to RHA District definitions. Future reports will also use consistent district geography for current-year and five-year populations; however, if district geographies change, populations for changed geographies may differ between current and future reports.

MUNICIPAL AMALGAMATIONS

The municipal amalgamations listed below are reflected in the five-year populations included in the 2013 population reports. These amalgamations were first implemented in the population data for 2010.

The Village of Garson has been amalgamated into the **RM of Brokenhead**.

The Village of Powerview has been amalgamated into the **Town of Pine Falls**.

The Town of Gimli has been amalgamated into the **RM of Gimli**.

The Town of Killarney has been amalgamated into the **RM of Turtle Mountain.** To reflect this, the RM of Turtle Mountain will now be called the **RM of Killarney-Turtle Mountain**.

The Town of Shoal Lake has been amalgamated into the **RM of Shoal Lake**.

The RM of Shellmouth has been amalgamated into the **RM of Boulton.** To reflect this, the RM of Boulton will now be called the **RM of Shellmouth-Boulton**.

The RM of Park North has been amalgamated into the **RM of Shell River**.

The 2013 population reports will be the last population reports to include populations from 2009 or earlier. As a result of this, populations will not appear in the 2014 population reports for the villages of Garson and Powerview; for the towns of Gimli, Killarney, and Shoal Lake; and the RMs of Shellmouth and Park North.

Note that additional municipal amalgamations have been announced since the release of the 2012 reports, effective January 1st, 2015. The resulting municipal populations will first be reported on in the 2015 population reports.

Population Changes

The purpose of this section is to highlight changes in the population of Manitoba. Changes are determined by comparing the registration file for the current year to that of the previous year. A file is created for additions (residents on the current file but not on the previous file) and one for deletions (residents on the previous file and not on the current file). After determining reason for coverage or cancellation, those coded as deaths, births and other (1) are separated, leaving only arrivals and departures. The deletions are subtracted from the additions with a resulting net migration.

Figures 1a, 1b, and 1c depict the actual number of residents cancelled from the registration system upon notification of death during the period June 1, 2011 to June 1, 2012. Figures 1b and 1c are female and male profiles.

Figures 2a, 2b, and 2c represent population migration. In-migration and out-migration with a resulting net migration trend line are depicted. Manitoba gained population through in-migration between June 1, 2011 and June 1, 2012. There were 30,752 in-migrants and 12, 878 out-migrants resulting in a net in-migration of 17,874. Figures 2b and 2c are the female and male trends.

(1) Member of the Armed Forces, inmate of a penitentiary, or not located.
